## **DETAILED ACTION**

1. Due to the amendments made to the claims, the claims are now drawn to patentably distinct inventions requiring undue burden on the examiner regarding examination thereof. Hence, the following restriction requirement is made.

## Election/Restrictions

Restriction to one of the following invention is required under 35 U.S.C. 121:
 Group I, claims 1, 3-14, and 17-18 drawn to an apparatus containing a data
 structure representing a presentation, which is classified under class 704, subclass 211.

Group II, claims 19-23 drawn to a method for playing a presentation, which is classified under class 704, subclass 503.

Inventions of group I & II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as scaling/compressing the audio signal in the time axis while invention of group II involves with reconstructing and presenting the original audio signal. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/849,719

Art Unit: 2655

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
